## JOB TITLE

Experienced in Ruby, Ruby on Rails, JavaScript and React based programming and a background in the service industry. Possess strong skills in project management, team building and management that help teamwork focused business operate effectively. I have always been involved with tech, from high school clubs to tinkering with games and computers, I have always loved it and am thrilled to start my career as a Software Engineer.

## TECHNICAL SKILLS

Ruby, Rails, SQL, Postgresql, Javascript, React, Redux, GraphQL, Next.js, Node, Material UI, Firebase

## TECHNICAL PROJECTS

### Personal Media Library - [Github](#) | [Demo](#)

A way to keep track of your personal collection of dvds and books.

- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Custom search function to allow for live searching of media
- Used serialization to standardize JSON output.
- Extensive use of CSS to create a styled user experience.

### Job Hunt Assistant - [Github](#) | [Demo](#)

An app to organize the job hunt.

- Used a Rails API back end to store data.
- Used a decorator pattern to structure the JS.
- Made use of asynchronous fetch calls with async/await.
- Used the dataset attribute to grab form input.

### Harry Potter Daily Prophet - [Github](#) | [Demo](#)

Newspaper staff site for generating newspaper in the style of the Daily Prophet from Harry Potter.

- Used scope to allow filtering of articles by author.
- Used 3rd party authentication for signing up and logging in with 3rd party providers.
- Created custom validations to validate form data.
- Utilized Amazon AWS to allow users to submit and use images.
